*Brown and Fraser is a research company founded by Regent University professor Dr. William Brown and Dr. Benson Fraser. To prepare the 2017 survey, field teams overseen by Brown and Fraser completed 25,102 interviews in 44 cities or regions of 14 countries. Results of these 14 country studies and results from previous CBN international programming studies were then applied to project the probable audience sizes and programming effects in all nations receiving CBN programming.
